

Enumeratio Pteridophytorum Japonicorum. II. Lycopodiaceae

Toshiyuki Nakaike

Natural History Museum and Institute, Chiba
955–2 Aoba-cho, Chuo-ku, Chiba 260, Japan

Abstract Twenty-two species and one variety in three genera of Lycopodiaceae are enumerated from Japan, i.e. twelve species with one variety of the genus *Huperzia*, three species of the genus *Lycopodiella*, and seven species of the genus *Lycopodium*. The related literature for the recognition of each taxon in Japan, information from a distribution map, chromosome numbers from Japanese materials, and illustrations of spores are cited.

Key words: Lycopodiaceae, *Huperzia*, *Lycopodiella*, *Lycopodium*, Japan.

The present paper is planned along the same lines as my book 'Enumeratio Pteridophytorum Japonicorum, Filicales' (Nakaike, 1975). The chief aim of this paper is to clarify the taxa of Japanese Lycopodeaceae, their scientific names, and the history of the recognition of each taxon in Japan. The literature for distribution and synonyms of each taxon is cited from the Old and New World. The chromosome numbers are also cited from studies of Japanese materials. In this paper twelve species with one variety of the genus *Huperzia*, three species of the genus *Lycopodiella*, and seven species of the genus *Lycopodium* are enumerated.

The classification of the family and genera follow the system of Øllgaard (1987). The genera and species are arranged in alphabetical order in each genus and species.

Enumeration

Huperzia Bernh.

Bernhardi in J. Bot. (Schrader) 1800(2): 126. 1801.

Lectotype of the genus: *Huperzia selago* (L.) Mar-tius et Scharank; Rothm. in Feddes Repert. 54: 59. 1944.

Huperzia carinata (Desv. ex Poiret) Trevisan in Atti Soc. Ital. Sci. Nat. 17: 247. 1874; Dixit, Census Indian Pterid. 7. 1984; Lycopod. India 62. f. 13A–B. pl. I. f. 10. map. 4. 1988; Øllgaard in Biol. Skr. 34: 11. 1989; Nakaike, New Fl. Jap. Pterid. rev. & enlarg. 791. 1992.

Lycopodium carinatum Desv. ex Poiret, Encycl. Suppl. 3: 555. 1813; Ito, Cat. Pl. Koishik. Bot. Gard.

日本羊歯植物総覧 II, ヒカゲノカズラ科

中池敏之

千葉県立中央博物館

〒260 千葉市中央区青葉町 955-2

日本に生育するヒカゲノカズラ科に属する全ての種類について、正名、異名、それぞれの種類の分布、分布図、染色体、胞子の図の関係する文献についてまとめた。取り扱われた種類は次のとおりである。コスギ

ラン属 (*Huperzia*) ではボウカズラ (*Huperzia carinata*), スギラン (*H. cryptomerina*), コウヨウザンカズラ (*H. cunninghamioides*), ヒモスギラン (*H. fargesii*), ナンカクラン (*H. fordii*), ヒメスギラン (*H. miyoshiana*), ヨウラクヒバ (*H. phlegmaria*), ヒメヨウラクヒバ (*H. salviniioides*), コスギラン (*H. selago*), トウゲシバ (*H. serrata*), ヒモラン (*H. sieboldii*), リュウキュウヒモラン (*H. sieboldii* var. *christenseniana*), コスギトウゲシバ (*H. somae*), ヤチギラン属 (*Lycopodiella*)

では, イヌヤチスギラン (*Lycopodeilla caroliniana*), ミズスギ (*L. cernua*), ヤチスギラン (*L. inundata*). ヒカゲノカズラ属 (*Lycopodium*) では, チシマヒカゲノカズラ (*Lycopodium alpinum*), スギカズラ (*L. annotinum*), ヒモヅル (*L. casuarinoides*), ヒカゲノカズラ (*L. clavatum*), アスヒカズラ (*L. complanatum*), タカネヒカゲノカズラ (*L. nikoense*), マンネンスギ (*L. obscurum*).
